

Compressed Air Controls - KAESER SIGMA Partner for Lower North Island KAESER rotary screw vacuum

packages can achieve up to 99% vacuum (so called "low vacuum"). Some examples of applications are dust suction, packaging, inspection, instruments, bottle and tube filling, drying, degassing and filtration. KAESER vacuum packages feature a specially developed and highly efficient vacuum block and, in common with KAESER screw compressors, are fitted with the new SIGMA, industrial-computer-based controller.

Important features and advantages:

- Super-economic operation thanks to the energy-saving SIGMA PROFILE and premium efficiency drive motor.
- Computer-based SIGMA CONTROL as standard.
- Reliable V-belt drive with automatic tensioning.
- Fluid pump flanged directly to the airend for security of operation.
- Soundproofing and vibration isolation fitted as standard for quiet and smooth running.
- Standard equipment including filter mats on the cooling air inlet to keep the interior of the package clean.
